Summary

Full Stack Developer with hands-on experience building scalable web applications using the MERN stack. Experienced in developing production-ready solutions, integrating payment systems, and designing backend workflows. Skilled in creating performant applications and solving real-world problems through modern web technologies and AI-powered systems.

Experience

SMVEN Technologies — Full Stack Developer Intern

May 2026 – Present

- Built scalable **MERN**-stack applications with authentication and payment integration.
- Designed **scalable routing architecture** for multiple technology programs
- Integrated **payment gateways, lead management workflows, email automation**, and **MongoDB data tracking**
- Improved **user conversion** through optimized registration forms and responsive UI components
- Collaborated with stakeholders to implement new business features and **course-specific landing pages**

Ishtva Technologies — Web Development Intern

Mar 2026 – Apr 2026

- Developed **reusable UI components** using React.js and built RESTful APIs with Node.js and Express.js
- Contributed to debugging, performance optimization, and feature enhancements in a collaborative Agile environment

Projects

StreamCast | *WebRTC, LiveKit, Supabase, IndexedDB, React.js* | GitHub

- Built a **browser-based recording studio** enabling real-time video collaboration and local media recording
- Integrated **WebRTC, LiveKit, Supabase, and IndexedDB** for video conferencing, authentication, room management, and offline storage
- Designed scalable recording workflows with support for **multi-track media capture**

NeuralFlow – AI Analytics & Insight Engine | *React.js, Node.js, MongoDB, Redis, Gemini API* | GitHub

- Developed a **full-stack AI analytics platform** with CSV upload and real-time data analysis capabilities
- Integrated **Gemini API** for LLM-based automated data interpretation and insight generation
- Built a scalable backend using **Redis and MongoDB** with monitoring and structured logging

Offline-First Order Management System | *Node.js, IndexedDB, MongoDB* | GitHub

- Built a **full-stack offline-first ordering system** using IndexedDB with background sync and conflict resolution
- Implemented **audit logging** and optimized system reliability for low-connectivity environments

Skills

Languages: JavaScript, Python, Java

Databases: MongoDB, MySQL, Redis

Tools & Technologies: Git, GitHub, Postman, Razorpay Integration

Core CS: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks

Education

Sagi Rama Krishnam Raju Engineering College

B.Tech in Computer Science – IoT & Cyber Security (Blockchain)

2023 – 2027

CGPA: 8.93/10
